SUMMARY

A 25-year-old career changer with experience working on ships, now transitioning into the software industry. Graduate of Telerik Academy with a strong interest in programming and building web applications. Known for strong problem-solving abilities, attention to detail, and excellent teamwork. Passionate about continuously updating technical skills to stay current in the fast-evolving software field and currently working on a new project that involves learning new technologies.

PROJECTS

Calendra

🔗 event-calendar-c74a9.web.app/

The Event Calendar Website enhances event management with a responsive design for all devices. Users can search for events by location, view top matches, check online or today's events, and easily add new events to their calendar. The platform allows users to create and manage custom contact lists, chat with others, and track their events in a calendar with different viewing options.

- **Technologies:** JavaScript, React, Firebase, OpenWeather API, Google Maps API

Estate Estate

🔗 <https://realestate-dcdcb.web.app/>

This project is a comprehensive real estate platform designed to facilitate the renting and buying of properties. Users can create accounts to access a wide range of property listings, each detailed with essential information and visualized on an interactive map. The platform aims to provide a seamless and user-friendly experience, allowing users to easily navigate through property options, view their locations, and manage their profiles.

- **Technologies:** TypeScript, React, Firebase, Tailwind

React Forum

🔗 reactduo-forumproject.web.app/

React Hub is a responsive forum website built with React, designed to offer a seamless user experience across all devices. Users can register, create posts, interact through likes and comments, and manage their profiles. The platform also features an admin mode, allowing administrators to block users, and includes a dark mode for enhanced accessibility.

- **Technologies:** JavaScript, React and Firebase

Flirty

Flirty is a dating app, currently in development, where users create detailed profiles and slide through other users. If two users like each other, a match is made, allowing them to chat and connect. The app is designed to offer an engaging and seamless experience for finding meaningful connections.

- **Technologies:** TypeScript, React, Firebase, Redux, SASS,
