PROJECTS

Calendra

🔗 event-calendar-c74a9.web.app/

The Event Calendar Website streamlines event management with enhanced functionality and a responsive design for all devices.
Features:

- Event Search: Users can search for events by location, and check online events, top matches, and events happening today.
- Event Adding: Easily add new events to your calendar.
- Contact Lists: Users can create contact lists and add users to them.
- Chat: Users can chat with other users in their contact lists.
- Event Calendar: Users can see all the events they have joined in the calendar.The calendar has different views.
- *Technologies: JavaScript, React, Firebase, OpenWeather API, Google Maps API*

React Forum

🔗 reactduo-forumproject.web.app/

This project is a responsive forum website built by me and a colleague from the academy using React and Firebase.
Features:

- **User Registration**: Create accounts.
- **Post Creation**: Share thoughts with new posts.
- **Interact with posts**: Like and Comment.
- **Profile Management**: Modify user profiles.

- *Technologies: JavaScript, React and Firebase*

Resume

🔗 petkov-petko.github.io/Resume-React/

My Web Resume is a React-based personal website where visitors can see all my projects and learn more about me.

- *Technologies: JavaScript, React*

EXPERIENCE

Deck Cadet
